Executive Summary

TSURUMI PUMP For The Earth, For All The People

■ As part of the three-year medium-term management plan, “Transformation 2027,” the Company acquired Fujimaru Sangyo Co., Ltd. as a wholly owned subsidiary (non-consolidated).
By integrating manufacturing, rental, construction, repair, and maintenance services, the Company will strengthen its total solution capabilities and reinforce its business foundation in the social infrastructure field. To commemorate this acquisition, the Company will pay a ¥3 per share commemorative dividend, bringing the total interim dividend to ¥16 per share, including the ordinary dividend of ¥13 per share.

■ Upward Revision of Full-Year Consolidated Earnings Forecast

Japan

Construction machinery market	Sales of electrode-type and medium-sized submersible pumps remained solid, driven by growing demand for environmentally friendly solutions.
Plant equipment market	Sales grew significantly as Smash Pumps sold well, driven by growing demand for decarbonization and cost optimization. The Smash Pump series, which has been praised for its ability to operate continuously at low water levels in road collapse restoration projects, contributed to sales growth.
Other markets	Sales of small submersible pumps in the tool manufacturing market and dehydrator-related sales in the plant market increased.

Net sales in Japan as a whole increased.

Overseas

North America	Net sales increased, supported by solid demand from the mining and construction markets despite a sense of uncertainty due to new tariff measures.
Asia	Net sales increased, driven by solid domestic demand in ASEAN countries and demand from the plant market in Singapore and Thailand.
Europe	Net sales increased as a result of growing demand for construction pumps from the infrastructure market, such as those used in tunnel projects, and submersible sewage pumps.
Other regions	Net sales increased despite the impact of the downturn in China’s real estate market and U.S.-China trade friction.

Reference: Financial Indicators

Capital Profitability

ROE (Actual FY3/26)

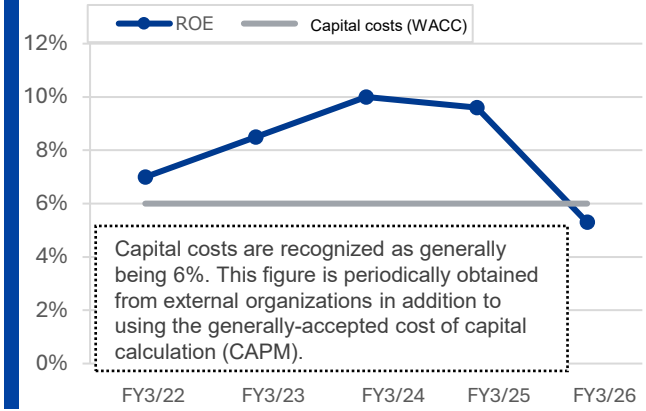

5.3%

ROIC (Actual FY3/26)

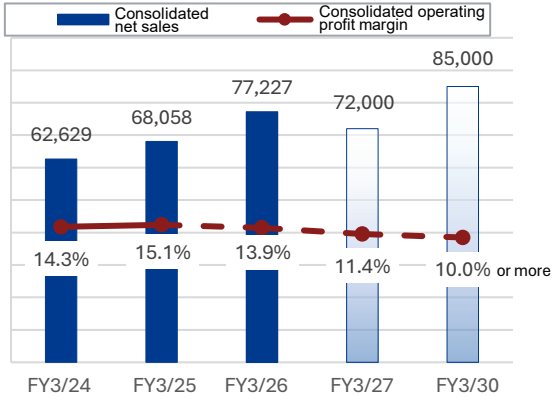

7.5%

*The Company specializes in submersible pumps, so ROIC by business segment is not calculated.

Trends in ROE

Trends in Consolidated Net Sales and Consolidated Operating Profit

*The figures for FY3/27 and FY3/30 are the target values in the medium-term management plan.

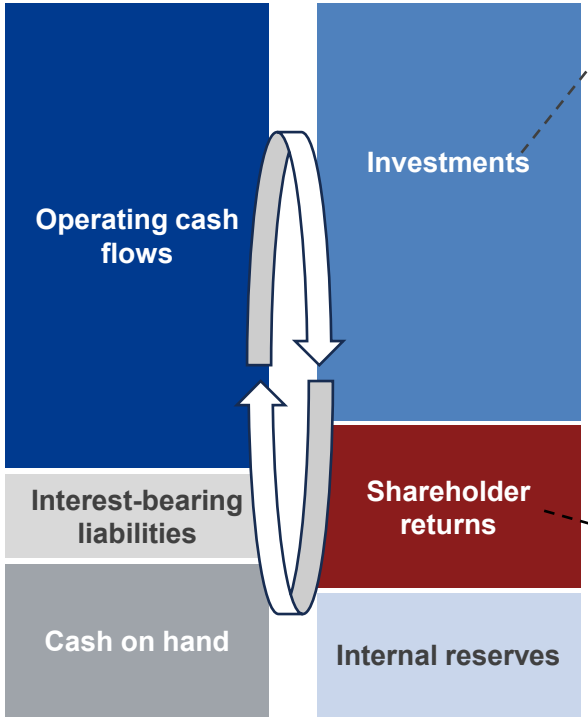

■ Target Values for Capital Profitability and Measures to Improve Them

- ◆ Achieve an operating profit ratio of 10% or more and an ROE of 10% or more in the long term (by FY3/30)
- ◆ Further utilize interest-bearing liabilities with a focus on the optimal capital structure and efficiently operate group funds
- ◆ Promote in-house production of key components for submersible pumps, such as motors and cast-metal parts, and improve QCD through various productivity improvements
- ◆ Develop high-added-value products that reliably contribute to increased efficiency and labor savings as exemplified by smash pumps
- ◆ Improve the Company's market share in the global plant/factory and mining markets where there is significant room for expansion

©2026 TSURUMI MANUFACTURING CO., LTD.

Reference: Capital Allocation

Secure sources of funds for proactive growth investments looking ahead to the medium- to long-term and BCP investments to connect to the next 100 years while providing shareholder returns based on flexible acquisition of treasury stock and reliable progressive dividend measures to improve capital profitability

*The size of each item does not indicate expected income or expenditure.

■ Growth investments, BCP investments, fundraising

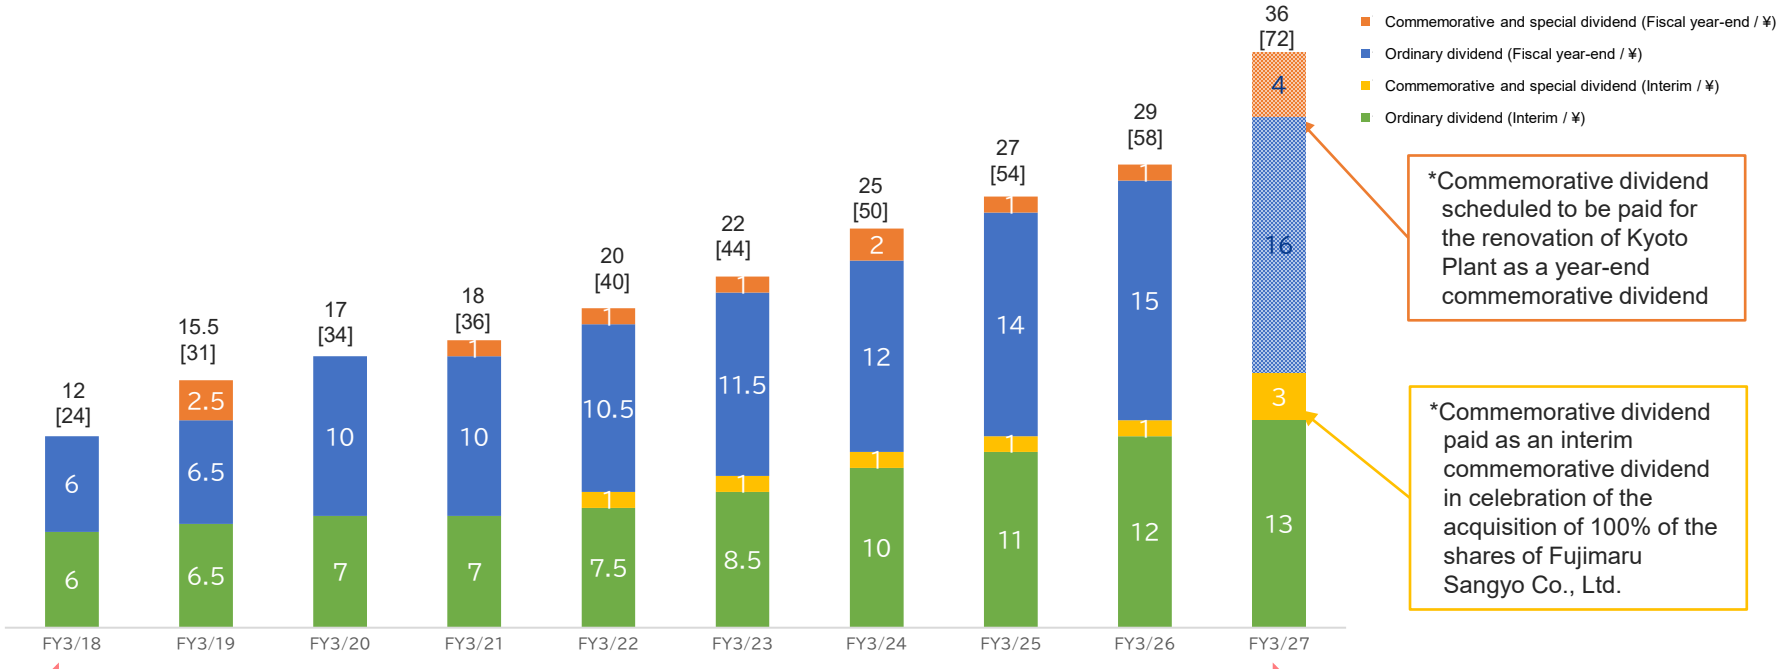

- ◆ **Growth investments and BCP investments over the next five years (expected to total about ¥18.5 bn)**
  - ► Promotion of in-house production of key components for submersible pumps, such as motors and cast-metal parts, using new manufacturing methods and BCP investments, including preparations for large-scale disasters with a high probability of occurring, such as a Nankai Trough earthquake: **¥8.0 bn**
  - ► Technological research and product development contributing to the global social issues of climate change countermeasures and labor-saving measures: **¥2.5 bn**
  - ► Use of solar power generation and renewable energies as part of ESG management: **¥1.0 bn**
  - ► Capture of the global plant/factory and the mining markets, and expansion in market share (M&As and business partnerships): **¥5.0 bn**
  - ► Rebuilding of the group's core systems to realize sustainable and efficient management: **¥2.0 bn**
- ◆ **Utilization of external capital (interest-bearing liabilities) in fundraising and reduction of cross-shareholdings**

■ Shareholder return measures

- ◆ **Flexible acquisition of treasury stock while monitoring stock market trends and taking into account liquidity**
- ◆ **Continuation of progressive dividend measures (target dividend payout ratio: 30%)**

©2026 TSURUMI MANUFACTURING CO., LTD.

Reference: Changes in Dividends

Continuation of a progressive dividend policy

Notes:

- Revisions to the forecast of cash dividends most recently announced: None
- The Company split its common shares at a ratio of two shares for every one share on October 1, 2025.
- The figures have been calculated under the assumption that the stock split was performed at the beginning of FY3/18.
- The figures in the square brackets indicate the amounts before the stock split.

©2026 TSURUMI MANUFACTURING CO., LTD.

TSURUMI MANUFACTURING CO., LTD.

■ Established: January 5, 1924

■ Paid-up capital: ¥5,188.5 million

Listed on the Prime Market of the Tokyo Stock Exchange

■ Net sales: ¥ 77.2 billion (consolidated for FY3/26)

■ Number of employees: 1,635 (Group total, FY3/26)

Excludes temporary, contracted, and part-time employees

■ Company overview: Manufactures and sells various pumps, focused on submersible pumps, as well as environmental equipment and peripheral equipment. Holds the leading market share in Japan for its core submersible pump business. Operates primarily in the civil engineering and construction work, sewerage system, water treatment, and other markets. Has also established an overseas sales network, centered on Asia, but also extending to North America, Europe, Australia, the Middle East, and Africa.
Production operations are Kyoto Plant, its mother plant in Japan, and are supported by its Yonago Plant as well as facilities in China, based in Taiwan , Vietnam, and Italy.

Primary Applications

TSURUMI PUMP For The Earth, For All The People

Construction Machinery Market

Construction and Civil Engineering Sector

Contributing to drainage and water pumping at construction sites

- Construction and civil engineering projects
- Tunneling projects
- Mining and excavation sites

Plant Equipment Market

Industrial and Plant Sector

Supports drainage in factories and plants

- Building and factory equipment
- Agriculture and irrigation
- Fishery and livestock facilities
- Shipyards
- Power plants
- Landscaping and recreational facilities

Infrastructure Sector

Supporting drainage, disaster preparedness, and disaster effect reduction in public infrastructure

- Sewage treatment plants
- Drainage pumping stations
- Rivers and flood control
- Flood mitigation measures
